NATIONAL REPUBLICAN.

COTTON PROSPECTS IN INDIA.

The English are jubilant over their prospect of getting cotton from India. The London Times, of October 30, says:

"That we can open markets in the E at when-ever the markets of the West may fail, we have already shown; but it now seems equally clear that we can find also in the East a substitute for the productions for which we have been accustomed to look almost exclusively to the West. India, which, properly stimulated, can produce all things, is bestirring hers, if to sup-ply our necessities in the article of cotton. What has been long certain in theory is now

ply our necessities in the article of cotton. What has been long certain in theory is now about to be shown in practice—that with American seed and European supervision we may obtain any quantity of cotton from India that Manchester will pay for.

"India is becoming active, laborious and prosperous. She is beginning to call for European products, and the English merchant is carrying to India his manufactured cotton goods in payment for the raw cotton which India is just learning to produce. America is a great element, but not a necessity to our commercial well-being."

The Liverpool Mercury of October 28, bears similar testimony:

"The accounts from India are more encour "The accounts from India are more encouraging than those from America. The Indian public seem to be at length thoroughly roused to the importance of the present crisis on the fortunes of India as a cotton-producing country. A very great step has been made by the introduction of steamboats on the upper part of the river Godwery. That great river, with its numerous tributary streams, flows through the most extensive of all the cotton fields of India—namely, that of Nappeor and Hyderbad. The quantity of cotton grown in this district is immense, and very little of it has ever found its way down the sea coast, owing to the difficulty of and cost of transport. Moreover, the quantity is superior to that of the Surat cotdifficulty of and cost of transport. Moreover, the quality is superior to that of the Surat cotton, and most equal to medium qualities of American. Mr. Mercer, one of the American planters who was employed by the East India Company to introduce the growth of the New Orleans cotton seed in India, speaking of this cotton saves:

cotton says;

"All the cotton I have seen from that neighborhood is of very good quality indeed, and better cleaned than is usual in Indian cot-

Great arrays of statistics from India are given in the London papers to prove that the people of India are going into the cutton business ex tensively. A Calcutta letter in the Times under date of September 23, says:

under date of September 23, says:

"The native mind seems to have been thoroughly roused on the cotton question. Accounts from all parts of the country, but more especially from the rich esten districts on the banks of the Godavery, speak of the area of land cultivated with outton as far exceeding the proportion of any previous year. Bombay and Madras have taken the lead in this race, but neither Central India nor the Northwest have been slack in their preparations. If these have not been so forward as might have been expected, the cause lies in the uncertainty which has hitherto prevailed r garding the duration of the civil war in America. If that were to be an affair of only a few months, add if at the expiration of that time the Southern States were to return to their normal condition of cotton suppliers to England, the only result of the enterprise of the native capitalist would be terrible losses and, possibly, ruin."

The Calcutta Englishman says:

"Our reports from all parts of the country

The Calcutta Englishman says:

"Our reports from all parts of the country continue to predict favorably of the expected outton crop of this year; indeed, we gather from all sides that an area considerably in excess of previous efforts are being made, in the cotton-growing districts of the Masras and Bombay Presidencies particularly, to enable them to meet any call that may be made upon them for their staple. Tinnevelly has, perhaps, done more in this respect than any other district, with the exception of Dharwar. The cotton-growing districts bordering on the Godavery river are also reported to have consideravery river are also reported to have consider bly increased the area usually devoted to the cultivation, and the facilities offered by the river for transporting it to the coast will ren-der any increase from this quarter highly de not only as offering a prospect of larger for money invested from the cheapness of water carriage to the coast, but from the same reason. In Tinnevelly great and suc-cessful efforts have been made not only to im-prove the staple derived from indigenous seed, (to which much attention has been paid in rent years,) but to introduce foreign varie

GEN. STONE. - A writer in the Boston Trans cript comments bitterly on the conduct of Gen. Stone. "He is known to be in high favor with the Maryland secessionists. These fellows express the greatest confidence in Gen. Stone ; and why shouldn't they? He orders the troops under his command to obey and observe the laws of Maryland, which forbid the harboring of fogitive slaves, &c.; protects known traitors who have been arrested by subordinate officers for making signals to the enemy, and when brought before him, have been discharged, with a reprimand to the officers making such arrests; sends back all negroes found in the camps to whoever claims them; and to crown his recommendations to their favor, has needlessly, foolishly, criminally, ordered our Massachusetts troops to unavailing slaughter."

THE REBELS' Erection .- At the "Presiden tial election" in the rebellious States, Jefferson Davis and Alexander H. Stephens were elected President and Vice President for a

term of six years. The following are the members of the rebel Congress elected in Virginia, so far as heard

Second district, J. R. Chambliss, of Green ville; Third district, ex President John Tyles of Charles City; Fourth district, Roger A. Pry-or, of Petersburg; Fifth district, Thomas S. Boccek, of Appomattox; Sixth district, John Goode, Jr., of Bedford; Seventh district, James F. Holcombe, of Albemarie; Eighth district, D. C. Dejarnette, of Caroline; Eleventh district, J. B. Baidwin, of Augusta; Twelfth district, Walter R. Staples; Thirteenth district, Fayette McMuilla; Fifteenth and Sixteenth Congressional districts—we have information that indicates clearly the election of Messas. Russell and Johnson, the present incumbents from these

A REBEL EMISSARY IN ENGLAND .- We get his bit of news from the London Star of Octo

been for some time past in England, a Confederate emisery, who has been striving to gain adherents to the cfluse of his employers by other agencies than simple argument. How far he has succeeded, we know not; but his activity has been ceaseless, and there are always some who are ready to run into the trap in which there is a golden bait. But by far the greater number of those who have been either openly advocating or suggesting, by crafty innendo, the breaking of the blockade, have been simply animated by bitter hatred for democratic institutions. Their antipathy to liberal principles, naturally induces them to ally themselves with those who would build up their new nationality upon the basis of the aristocracy of color, and, moreover, they well know that their vaunts concerning the bursting of the Republican bubble can only be verified by the foreible retention of slavery as a Federal institution. But their hopes are vain, for the firm and laudable declaration of Earl Russell has proved that the Government will not be duped by their specious arguments. The game is played out, leaving the lotters with the duped by their specious arguments. The game is played out, leaving the plotters with the contempt of their countrymen for their sole re-ward."

ATTEMPTED SUICIDE OF A UNITED STATES OF-FICKE.—On Wednesday last, Captain Jefferson Bond, of company G, Second infantry, (regu-lars.) shot himself at Mendota, Ill., while en-route to Washington with his regiment. He was observed to read a letter and replace it in his packet, when he drew his pistol and shot himself in the breast. He was carried in the cars to Chicago, where he lies in a critical condition. On being questioned by the Doctor as to his reasons for the act, he stated that the letter he was seen to read was from his wife, and intimated that domestic difficulties had made him desirous to end his life. made him desirous to end his life.

TAKE CARE OF THE COTTON .- Governmen TARE CARE OF THE COTTON.—Government should appoint, if it has not already appointed, some one to the special service of gathering in the cotton which has been found growing so plentifully in the vicinity of Port Royal, and which is now just ready for picking. All the help wanted for this work could easily be found among the negroes, and it only needs some efficient man to attend to the matter to make their labor available.— N. Y. Ecc. Post.

THE REPORTED BURNING OF COTTON .- The The Reported Burning of Corron.—The Charlestoh Courier says: We deem it due to later and more accurate information to correct the reports which first reached the city concerning the amount of cotton opened to the invaders. Late reports received from planters and residents acquainted with the facts of the case state that very little, if any cotton, will be found in bales and storchouses. Some of the crops in the field will be destroyed, and some we know have been destroyed.

A telegram from St. Louis, November

"Gen. Hunter has sent a letter to General Price, by a flag of truce, repudiating the treaty between him and Ges. Fremont, entered into November 1st, and has addressed a letter to Adjutant General Thomas setting forth his reasous therefor."

The following appointments were made to-day by the War Department: George H. Burns, of Philadelphia, formerly connected with the American Telegraph Company at Washington, Edward D. Waite, William B. Barney, and John E. Yard, Second Lleutenants in the regular army. Alexander B. Dyer, appointed Brevet Major, and Colonel Heury Van Renssalaer, In-spector General. spector General.

The follow og military appointments were made Monday, viz:

Assistant Adjutant Generals of Volunteers.—
Captain Leonard Scott for General Pain's' brigade. Capta'n John Pound for General Price's briga ie. Captain George A. Hicks for General Burns's brigade. Captain Andrew C. Kemper for General Wade's brigade. Captain William Von Dohn for General Duryea's brigade.

Captain Charles A. Reynolds, to be an assistant quartermaster in the regular service.

Aids de camp.—William Sheffler, to be an aid
to Major General Banks.

Governor Berry, of New Hampshire, according to the Exeter News Letter, was very nearly taken prisoner by the reb-is on the 5th inst. He went into Virginia, got beyond our pickets, and would have been in the bands of the Philistiues had not an officer sent a party after the Governor.

The Iron works of Ridgway & Co., in Germantown, Philadelphia, which have recently been engaged in the manufacture of sabres for the Government, were destroyed by fire on Thursday. An incendiary did the mischief.

We learn from England, that owing to the excessive use of opium, the Right Hon. P D'Israeli has lost his health. It is doubtfu

The Boston Daily Advertiser learns that it is doubtful whether, in consequence of the state of his family, Mr. Everett will be able at pres has been tendered him by Mr. Seward.

George D. Kellogg, of Chicago, has been appointed Awistant Adjutant General of Volunteers, with the rank of captain, and assigned to General Stanley's staff.
